

Application No. 09/823,940

Docket No.: 102374-0015

REMARKS

This reply is submitted in response to the Advisory Action dated June 23, 2006. Claim 1 is amended, as noted above. The amendments above and the remarks that follow are believed to place this application in condition for allowance.

Claim Amendments

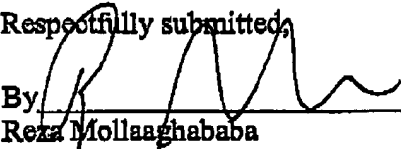

In the Advisory Action, the Examiner states that the amendment previously made to claim 1, in which the phrase "signal from the context object" was added, represents additional features requiring further consideration and/or search. This amendment was made in response to a previous rejection under 35 U.S.C. §112, second paragraph. In response, claim 1 is now further amended, as above, to more clearly define the subject matter. This amendment is believed to adequately address the Examiner's concerns. Applicants note that this amendment does not augment additional features to claim 1.

Conclusion

In view of the above amendments and remarks, Applicant respectfully submits that the claimed invention is patentable. Applicant therefore kindly requests reconsideration and allowance of the pending application.

Dated: July 7, 2006

Respectfully submitted,
